50+ projects delivered	6 countries	99.9% uptime on software we run	4.8★ average client rating
----------------------------------	-----------------------	---	--------------------------------------

Services built for modern businesses.

Custom applications

- Custom software built for how you work
- Web apps and websites

Enterprise apps and modernization

- Enterprise apps that connect ERP, CRM and reporting
- Modernize old software step by step

AI and advanced tech

- AI assistants that answer in minutes, not hours
- Automate reports, reminders and follow-ups

eCommerce and digital storefronts

- Shopify stores built to sell
- Webflow websites that bring in leads

UX optimization and accessibility

- Simple design people can use without training
- Accessible from day one

Support and dedicated teams

- Maintenance and support with a monthly report
- Add experienced developers in 1 to 2 weeks

Software built for your industry.

Manufacturing

Attendance and shift tracking, production and maintenance dashboards, and reports that pull from your ERP automatically.

Healthcare

Patient intake and scheduling, secure portals, and AI assistants that take admin off your staff. Privacy and access control built in.

SaaS

Product development from first release to scale, websites that turn visitors into demos, and extra engineers when you need them.

Biorenewables

Plant, field and lab data in one place, simple compliance reporting, and monitoring and automation for the operation.

Ready-built software we run for you

OpsDeck

Attendance software for manufacturing
OpsDeck is ready-built attendance software for manufacturing teams: shifts, breaks and overtime with biometric.

GarageZone

Garage management software for workshops
Ready-built garage management software for automotive workshops and service centers: job cards, bookings, parts,.

LoopIQ

Learning and testing platform for training providers
LoopIQ is a ready-built learning and online testing platform for training providers, staffing firms and assessors,.

Verko

AI governance and compliance platform
Verko automates risk assessments, evidence collection and audit preparation across 15+ regulatory frameworks, from the.

Real results for real businesses.

\$1.2M

Predictive maintenance and one ERP across three plants cut unplanned downtime 72% and saved a global machinery manufacturer \$1.2M a year.

+28%

Brightlane Auto Group moved all nine branches onto GarageZone in 11 weeks. Bay utilisation rose 28%, and we still run it.

-72%

An AI support assistant took first response from hours to under two minutes and cut manual ticket handling by 72%.

+38%

A faster, conversion-led Shopify rebuild lifted conversion 38% and added six figures of revenue in the first quarter.

HOW WE WORK

Our development process.

01

Discovery and alignment

A 30-minute call. We agree on goals, users and limits, then plan the project in a week with a price in writing.

02

Design and prototyping

You click through a prototype before we build, so the direction is agreed early and nothing is a surprise.

03

Build and quality checks

We build in 4 to 8 weeks with continuous testing and security checks, and show you progress every week.

04

Launch, run and improve

We take it live, keep it running, fix issues fast and keep improving it, with a short monthly report.

WHY INFOLOOP

Why choose Infoloop?

Senior engineers from day one

Experienced people lead your project. The people you meet are the people who build.

A price in writing, not a range

Fixed scope, timeline and price before we start. Weekly demos on your real data, so nothing drifts.

Live in weeks, not quarters

New software live in 4 to 8 weeks. Old software modernized step by step, without stopping the business.
